Stephanie:

Attached are the updated figures and tables including an additional 3 locations requested by the CPG modelers. The three locations include one at RM 7.5 on the left bank and two at RM 14.5; the later are to better understand some results from a 2008 MPI EMBM sample (#172), however this location doesn't appear on the maps, since there was no surficial segment (0-6") collected. One of the new locations is co-located with it.
